SUMMARY

Software Test Engineer at Wipro focused on Windows feature validation, manual testing, regression testing, defect reporting and release readiness. Trained as a full-stack developer in Python and Java, which helps in understanding how software fails and in writing defect reports that developers can act on. Currently learning cybersecurity.

EXPERIENCE

Project Engineer · **Wipro** Mar 2025 – Present

Hyderabad (Hybrid) · Windows Feature Testing / QA · Project K2 (client project)

- Execute manual test cases and validate them against expected Windows feature behaviour.
- Perform edge-case and negative testing to find failures before release.
- Log defects with clear reproduction steps and expected vs actual results.
- Retest fixes and run regression checks before releases.
- Validate builds for release readiness, working with development and project teams.

Software Engineer Intern · **RPS Consulting** Dec 2024 – Mar 2025

Remote

- Python full-stack training and project work.

Software Trainee Engineer · **Trisun Technologies** Jul 2024 – Sep 2024

On-site

- Java / full-stack development and testing.

PROJECTS

CRM Web Application · Personal project · Full-Stack Developer

Python, Flask, SQLAlchemy, MySQL, PyMySQL, HTML, CSS, JavaScript, Bootstrap, Fetch API, Flask-Migrate / Alembic

- Built a customer relationship management CRUD web app: Flask backend, SQLAlchemy data layer on MySQL with Alembic migrations, and a JavaScript (Bootstrap) frontend using asynchronous Fetch API calls.

IoT-Based Coal Mine Safety Monitoring & Alerting System · Academic project (B.Tech, team)

Role: Project Leader · Frontend Development · Testing | Arduino, gas, temperature and smoke sensors, buzzer, WiFi phone alerts

- Arduino-based IoT safety monitoring system that detects gas, temperature and smoke threshold breaches and triggers local and remote alerts.
- Led the team and coordinated work; developed the frontend/interface; performed functional testing, sensor-condition and alert validation, positive and negative scenario testing and expected vs actual checks, documenting issues found.

SKILLS

Testing	Manual Testing, Functional Testing, Test Case Design, Test Execution, Edge-Case & Negative Testing, Regression Testing, Retesting, Bug Reporting, STLC, Unit Testing, Debugging
Windows QA	Windows Feature Validation, Build Validation, Release Readiness, Defect Lifecycle
Programming	Python, Java, SQL, HTML, CSS, JavaScript
Backend / Database	Flask, SQLAlchemy, MySQL, PyMySQL, Flask-Migrate, Alembic
Tools	Windows, Python, Java, MySQL, Git, GitHub, VS Code, Docker

EDUCATION

B.Tech, Electrical & Electronics Engineering · St. Martin's Engineering College 2019 – 2022

Diploma, Electrical & Electronics Engineering · Singareni Collieries Polytechnic 2016 – 2019

SSC · Krishnaveni Talent School, Godavarikhani 2016

CURRENTLY LEARNING

Cybersecurity (in progress): ISC2 Certified in Cybersecurity (CC), SOC Level 1, CompTIA Security+.
